Languages

Hindi
Native

English
B2

Summary

Aspiring Full-Stack Developer with a solid foundation in **Frontend technologies (React.js, HTML, CSS)** and currently expanding technical expertise into **Backend development (Node.js, MongoDB)**. Proven ability to handle responsibility through an **Admissions Internship**, managing 100+ candidates with strong communication and mentoring skills. Passionate about building user-friendly web applications and eager to apply growing technical skills in a professional development team.

Experience

NavGurukul — May 2025 - Dec 2025
Admission Intern

- **Orchestrated** the admission and evaluation lifecycle for **100+ applicants**, ensuring a structured and merit-based selection process.
- **Spearheaded** one-on-one technical mentoring and "Learning Rounds" to assess candidate logic, communication, and problem-solving skills.
- **Facilitated** feedback loops between candidates and the core team, improving the onboarding efficiency by providing actionable insights.

Projects

Productivity Tracker
React.js, Node.js, Express.js, MongoDB
🔗 Live Demo

- **Developed** a production-ready CRUD application with a dedicated **Node.js/Express backend** and MongoDB Atlas cloud persistence.
- **Integrated** secure RESTful API endpoints and utilized **Axios** for seamless frontend-backend data synchronization.
- **Optimized** user engagement by implementing real-time toast notifications, task counters, and mobile-responsive UI components.

Real-time Weather App
React.js, OpenWeather API, Geolocation
🔗 Live Demo

- **Built** a responsive SPA that delivers real-time meteorological data using **Geolocation API** and OpenWeatherMap integration.
- **Leveraged AI-assisted development** (Cursor) to refactor code and implement advanced error-handling for approximate location edge cases.
- **Designed** an aesthetic **Glassmorphism UI** with dynamic weather icons and persistent search history.

Markdown Notes Taker
React , LocalStorage
🔗 Live Demo

- **Engineered** a high-performance notes application featuring a **Live Markdown Preview** engine with GitHub-flavored markdown support.
- **Architected** complex state logic for **note pinning, multi-criteria sorting, and real-time search** filtering to optimize information retrieval.
- **Implemented** custom theme-switching (Dark/Light mode) and color-coding features with **persistent state synchronization** via LocalStorage.
- **Designed** a modern, responsive grid layout with focus-state accessibility and smooth CSS transitions for a premium user experience.

Education

Shoolini University, Solan, Himachal Pradesh — August 2025 - 2028
Bachelor of Computer Applications (BCA)

NavGurukul Foundation of Social Welfare Dantewada — 2024 - 2026
Software Engineering Diploma Course — Diploma
